SUMMARY

Experienced Python developer (5+ years) with expertise in Django, Flask, and Frappe. Strong background in cloud services (AWS, GCP, Firebase), relational and NoSQL databases, and DevOps practices including Docker and Git. Proven track record of delivering scalable, high-performance applications that improve efficiency and automate business processes.

EDUCATION

GAUHATI UNIVERSITY BE IN ELECTRONICS AND TELECOMMUNICATION

Aug 2014 - Aug 2018 | Guwahati, AS
Assam Engineering College

SKILLS

PROGRAMMING LANGUAGES

• Python • JavaScript

FRAMEWORKS

• Django • Flask • FastAPI

• Frappe

DATABASES

• PostgreSQL • MySQL • MongoDB

CLOUD INFRASTRUCTURE

• GCP (Cloud Functions, App Engine Pub/Sub, Cloud Run, Cloud Storage)
• Firebase (Realtime Database, Cloud Messaging, Firestore, Authentication)
• AWS (S3, Lambda, EC2, IAM)

BACKEND ENGINEERING

• System Design • Design Patterns
• Event-Driven Architecture • Caching
• Microservices • Redis • Background Job Processing
• Authentication & Authorization • REST API • Celery

DEVOPS & TOOLS

• Grafana • Docker • Jenkins • GIT

INTEREST

Artificial Intelligence
Machine Learning

LANGUAGES

English: Fluent
Hindi: Fluent
Assamese: Native

EXPERIENCE

AMBIBUZZ TECHNOLOGIES LLP | SOFTWARE ASSOCIATE

Oct 2020 – May 2024 | Mumbai, MH

- Engineered **Flask**-based order and HR management systems using modular backend architecture, system design principles with **RESTful APIs** reducing administrative overhead by 75%
- Designed and implemented an event-driven integration system between **NetSuite** and **ERPNext** using **GCP Cloud Functions** and **GCP Pub/Sub**, eliminating manual record transfers and reducing data entry time by 100%.
- Engineered scalable **Dockerized** multi-tenant infrastructure with centralized monitoring through a custom **Frappe** dashboard, achieving 40% less downtime and 50% faster incident resolution.
- Built custom **Frappe** applications using reusable design patterns and service-oriented architecture to automate report synchronization between **NetSuite** and **ERPNext**, including archival to **AWS S3**.

DRIVEX MOBILITY PVT LTD | BACKEND DEVELOPER

Jun 2024 – Present | Bengaluru, KA

- Architected and developed a cloud-based **SaaS** product for two-wheeler inspection services, covering inspection workflow management, reporting, and customer portal features.
- Led backend system design and development of the logistics module in **Django** improving delivery tracking and operational visibility by 50%
- Designed and developed backend services and internal platforms for Dealer Auction and C2C vehicle-selling systems increasing business revenue by 80%
- Introduced custom **Frappe** application for Business Analytics, Inspection service, Sales, Purchase, Stock, Accounting and Manufacturing streamlining business workflows and improving overall operational efficiency by 50%.

PROJECTS

GOD TALK – AI CONVERSATION PLATFORM | React, Fastapi, Mongodb, AWS

April 2025 – September 2025

- Built a scalable AI conversation platform using system design principles to enable interactive, context-aware conversations with deity personas powered by large language models
- Developed **FastAPI** backend services, with modular API architecture, prompt orchestration pipelines, and **MongoDB**-based conversation management.
- Optimized LLM responses for accuracy and tone using system prompts and conversation pipelines.

TARGETX - SALES MANAGEMENT APP | Python, JavaScript, Frappe, MySQL

April 2023 – March 2024

- Built **Frappe** applications using reusable design patterns and scalable backend architecture to import historical sales data from **AWS S3**.
- Designed analytical dashboards for target tracking and achievement monitoring across multiple business metrics with real-time reporting capabilities.
- Streamlined tracking and reporting of daily sales activities for sales teams, improving accountability and decision-making.
